I Sistemi: Quattro diversi programmi modulari per la zona lavabo per celebrare i vostri rituali quotidiani.

The Systems: Four different modular programs for the washbasin area to celebrate your daily rituals.

Systems / Sistemi

The basin area is one of the most complex areas of the bathroom from a functional point of view. Our five systems, each in its own way, satisfy every functional and aesthetic need in well-organized compositions and with a very high degree of customization. Moving on the architectural scale and sharing its language, our systems integrate perfectly into the space that hosts them to celebrate your daily rituals.

L'area lavabo è una delle zone più complesse del bagno dal punto di vista funzionale. I nostri quattro sistemi, ognuno a modo suo, soddisfano ogni esigenza funzionale ed estetica in composizioni ben organizzate e con un altissimo grado di personalizzazione. Muovendosi sulla scala architettonica e condividendone il linguaggio, i nostri sistemi si integrano perfettamente nello spazio che li ospita per celebrare i vostri rituali quotidiani.

A. Sistema Evo 21 / Evo 21 system

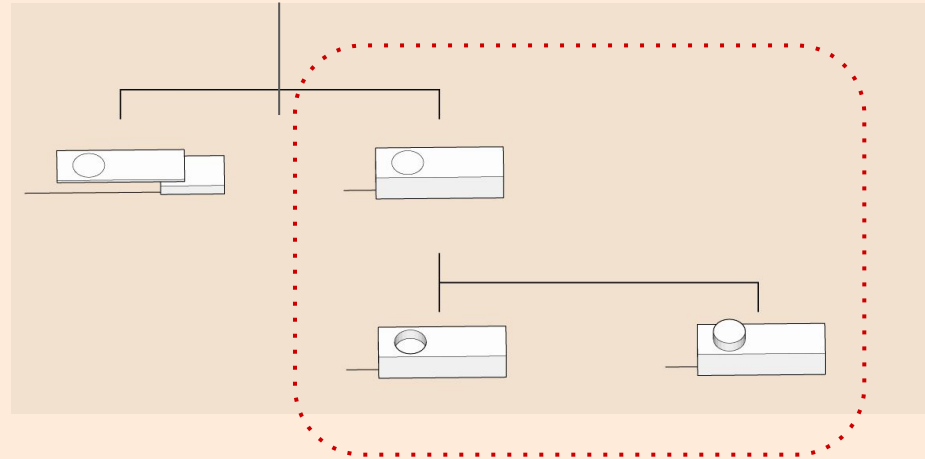

Che cos'è Evo 21 / what is Evo 21

Evo 21 è il nuovo sistema modulare entry level per la composizione di pareti monoblocco con contenitori chiusi dalla grande capacità di contenimento.

Evo 21 is the new entry level modular system for monobloc wall composition with closed storage units with a large containment capacity.

Evo 21

Litorale: integrated washbasin / Litorale: lavabo integrato

The Litorale channel washbasin, in its countertop version, was designed to be the ideal companion to the Evo 21 system. Its dimensions perfectly integrate Litorale into the precise architectural geometries of the system. 50 cm deep, the height of the washbasin is only 6 cm while the range of lengths goes from 80 to 240 cm (nominal) for the version with one waste and from 160 to 240 cm for the version with two drains.

The material used in its construction, solid surface in 12 mm sheets, contributes to build the perfect interface between the two products. In the basin it is also possible to place trays of different sizes (20, 40 and 60 cm) in two different materials (white solid surface or solid iroko wood).

Following the general rules of the Evo 21 system, even when Litorale is used, the basin / top must cover the entire length of the composition and the two sides.

Il lavabo a canale Litorale, nella sua versione in appoggio, è stato concepito per essere l'abbinamento ideale al sistema Evo 21. Le sue dimensioni integrano perfettamente Litorale nelle precise geometrie architettoniche del sistema. Profondo 50 cm, l'altezza del lavabo è di soli 6 cm mentre la gamma delle lunghezze va da 80 a 240 cm (nominal) per la versione con uno scarico e da 160 a 240 cm per la versione con due scarichi.

Anche il materiale utilizzato, il solid surface in lastre da 12 mm, contribuisce a costruire l'interfaccia perfetta tra i due prodotti. Sul catino è inoltre possibile inserire i piani di appoggio di diverse dimensioni (20, 40 e 60 cm) in due diversi materiali (solid surface bianco o legno iroko massello).

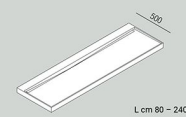

Seguendo le regole generali del sistema Evo 21, anche quando si utilizza Litorale, il catino/piano deve coprire l'intera lunghezza della composizione e i due fianchi.

Contenitori / storage units

Evo 21 containers come in three different heights: 30, 40 and 70 cm. The length of the containers is modular, starting from 40 cm, every 20 cm, up to 120 cm. Their depth is always 50 cm.

Every type of container can be made to measure between 40 and 120 cm.

The introduction of 30 cm containers allow for more articulated modularity, higher containment capacity and more nicely proportioned compositions.

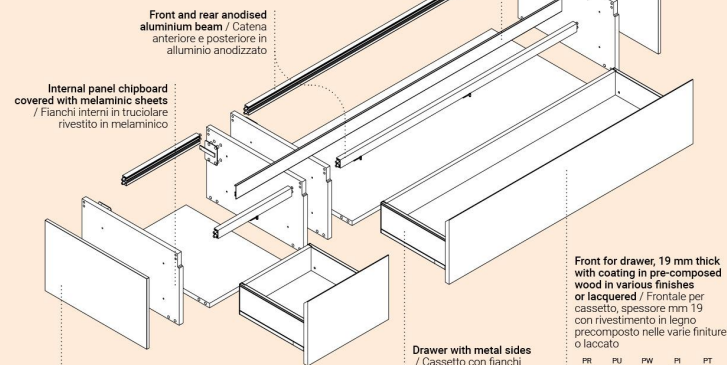

Evo 21 containers are closed only on three faces: the bottom and the two sides. The top and the back are always open, therefore every container needs to be covered by a countertop. The front is always fully closed by the drawers' front panels.

I contenitori Evo 21 sono disponibili in tre diverse altezze: 30, 40 e 70 cm. La lunghezza dei contenitori è modulare, a partire da 40 cm, ogni 20 cm, fino a 120 cm. La loro profondità è sempre di 50 cm.

Ogni tipo di contenitore può essere realizzato su misura da 40 a 120 cm.

L'introduzione di contenitori da 30 cm consente una modularità più articolata, una maggiore capacità di contenimento e composizioni più piacevolmente proporzionate.

I contenitori Evo 21 sono chiusi solo su tre lati: il fondo e le due facce laterali. Il top e lo schienale sono sempre aperti, quindi ogni contenitore necessita di essere coperto da un piano. Il frontale è sempre completamente chiuso dai frontali dei cassetti.

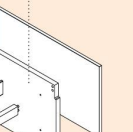

Lateral finishing panels, 12 mm thick in solid surface, in pre-composite wood, lacquered, open-pore lacquered, or in marble / Fianchi di finitura laterali, spessore mm 12 in Solis surface, legno precomposto, laccati, laccati a poro aperto o in marmo

Beam cover in white or dark grey painted aluminium / Rivestimento per catena in alluminio verniciato bianco o grigio scuro

Chipboard covered with melaminic sheets / Truciolare rivestito in melaminico

Front for drawer, 19 mm thick with coating in pre-composed wood in various finishes or lacquered / Frontale per cassetto, spessore mm 19 con rivestimento in legno precomposto nelle varie finiture o laccato

Contenitori / storage units

The simplicity of Evo 21 and its compatibility with the rest of the Agape catalogue is ensured by its modularity. The container units are available in lengths of 40, 60, 80, 100 and 120 cm. By placing one or more modules next to each other the length of the overall composition can range from 80 to 240 cm.

Evo 21 introduces a new set of vertical dimensions for its containers that can be 30, 40 or 70 cm tall resulting in compositions with refined proportions and high containment capacity.

La semplicità di Evo 21, e la sua compatibilità con il resto del catalogo Agape deriva anche dalla sua modularità. Gli elementi contenitori sono disponibili in lunghezze da 40, 60, 80, 100 e 120 cm che, con il loro accostamento, permettono di realizzare composizioni di lunghezze complessive che vanno da 80 a 240 cm.

Evo 21 introduce una nuova gamma di altezze per i suoi contenitori che possono essere 30, 40 o 70 cm di altezza e permettono di realizzare composizioni dalle proporzioni raffinate e dall'elevata capacità di contenimento.

Contenitori / storage units

he flexibility of Evo 21 is not limited to its extensive modularity: each container can be made to measure. The system doesn't include compensation elements to ensure a maximum formal cleanliness and the best use of the containment spaces.

Flexibility also means easy installation. Evo 21 adapts with its volume to any installation situation allowing the management of the hydraulic parts directly in the space available behind the drawers. This allows to accommodate the existing position of the drain and have maximum freedom in the placement of taps and washbasins.

Evo 21 is configured as the ideal choice not only for complete projects but also for light renovations that do not involve structural interventions.

La flessibilità di Evo 21 non deriva solo dalla sua estesa modularità: ogni contenitore può essere realizzato su misura. Il sistema non prevede elementi di compensazione, ne deriva una grande pulizia formale e un ottimale sfruttamento degli spazi di contenimento.

Flessibilità vuole anche dire facilità di installazione. Evo 21 si adatta con il suo volume ad ogni situazione impiantistica permettendo la gestione delle parti idrauliche direttamente nello spazio disponibile dietro i cassetti. Diventa così possibile accomodare la posizione esistente dello scarico e avere massima libertà nella collocazione della rubinetteria e dei lavabi.

Evo 21 si configura come la scelta ideale non solo per progetti completi ma anche per ristrutturazioni leggere che non prevedono interventi sulla muratura.

Fianchi / finishing sides

The finishing sides are mandatory on both sides of the composition.

They are available in three heights (30, 40, 70 cm) and a single thickness: 12 mm, available only in pairs.

The sides are not bound to the top but must be the same on both sides of the composition.

I fianchi di finitura sono obbligatori su entrambi i lati della composizione.

Sono disponibili in tre altezze (30, 40 e 70 cm) e un unico spessore: 12 cm, acquistabili a coppia.

I fianchi non sono vincolati alla finitura del piano ma devono essere uguali su entrambi i lati della composizione.

AE21F7_

H 70 cm finishing sides / Fianchi di finitura H cm 70

Copricatena / beam cover

The linear development of Evo 21 is further underlined by the groove handles that run through the whole length of the composition. Available in different colors (white and dark grey), the same grooves can have different finishes, further contributing to the overall graphic configuration of the whole.

The beam covers run through the whole length of the composition and cover all the joints between the containers. For the 30 and 40 cm tall containers you will need to specify one cover, while for the 70 cm tall containers, you will have to add two covers.

The length of the beam cover is equal to the sum of the length of the containers therefore it is also equal to the nominal length of the composition itself :

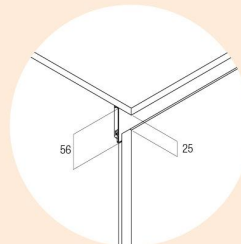

L cover = L containers = L nominal

Lo sviluppo lineare di Evo 21 è accentuato dalle gole che corrono continue per l'intera lunghezza del volume. Le gole possono avere diverse finiture (bianco e grigio scuro) per comporre e raggruppare graficamente i diversi elementi della composizione.

I copricatena percorrono tutta la lunghezza della composizione e coprono tutte le giunzioni tra i contenitori. Per i contenitori alti 30 e 40 cm è necessario specificare un solo copricatena, mentre per i contenitori alti 70 cm ne vanno considerati due.

La lunghezza del copricatena è uguale alla somma della lunghezza dei contenitori per cui è anche uguale alla lunghezza nominale della composizione intera:

L copricatena = L contenitori = L nominale

Alzate / splash-back panels

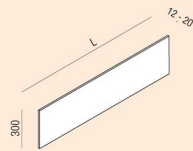

Splash-backs in different materials available 30 or 40 cm high, in wood, marble or Solid Surface, to be placed against the wall and on the back edge of the countertop.

The lengths are nominal and equal to the overall dimensions of the storage units. The actual dimensions of the splash-back have increased by 26 mm as well as for tops.

L=nominal size, real length + 26 mm

AE21A3_

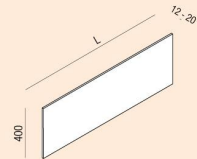

Back-splash 30 cm high, in white solid surface or in phenolic birch plywood with 12 mm thick plywood cladding or 20 mm thick marble / Alzata con altezza 30 cm, in solid surface bianco o in multistrato di betulla fenolica con rivestimento in legno precomposto con spessore 12 mm o in marmo con spessore 20 mm

Alzate in diversi materiali disponibili in due altezze: 30 e 40 cm, in legno, marmo o solid surface, da posizionare a parete e in appoggio sul bordo posteriore del piano.

Le lunghezze sono nominali e sono pari all'ingombro dei contenitori. Le misure reali delle alzate sono aumentate di 26 mm come per i piani.

L=misura nominale, lunghezza reale + 26 mm

AE21A4_

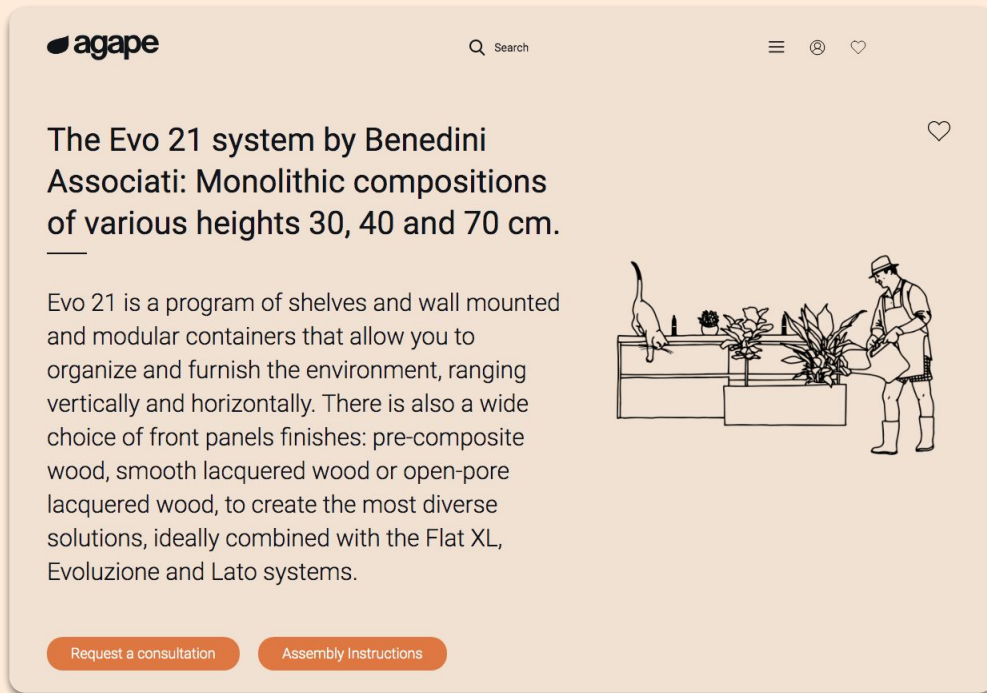

Back-splash 40 cm high, in white solid surface or in phenolic birch plywood with 12 mm thick plywood cladding or 20 mm thick marble / Alzata con altezza 40 cm, in solid surface bianco o in multistrato di betulla fenolica con rivestimento in legno precomposto con spessore 12 mm o in marmo con spessore 20 mm

C. Sistema Flat XL / Flat XL system

Componenti / components

The Flat XL programme was designed by Benedini Associati and is in production since 1997.

Tops in oak, teak, Exmar, Cristalplant® biobased or in marble, of different thickness and in various types, predisposed to house over countertop, semi-recessed, built-in or integrated washbasins.

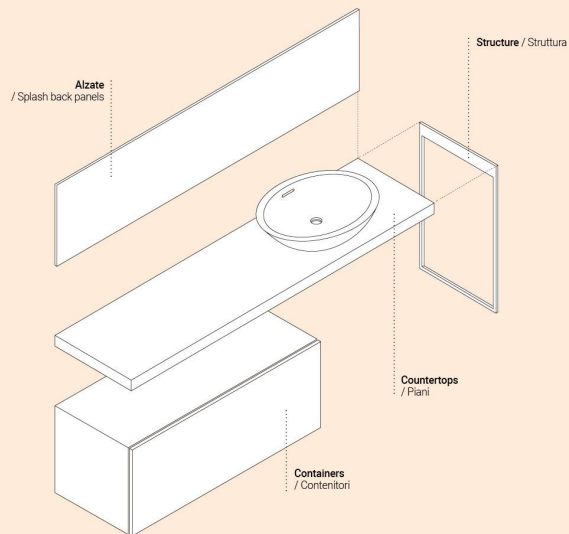

Storage units in oak, teak or painted. All these options give life to numerous configurations.

The tops don't include neither the sinks.

Il programma Flat XL è disegnato da Benedini Associati ed è in produzione dal 1997.

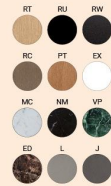

Piani in rovere, in teak, in Exmar, in Cristalplant® biobased o in marmo, con spessori diversi ed in diverse tipologie, predisposti per alloggiare lavabi d'appoggio, a semincasso, ad incasso o con lavabi integrati. Contenitori in rovere, teak o laccati. Tutte queste possibilità danno vita a molteplici combinazioni.

I piani non sono compresi di lavabi.

Alzate / splash-back panels

Splash-back panels in birch plywood in different finishes, in white Cristalplant® biobased or marble, to be placed against the wall and on the back edge of the countertop.

For the installation of built-in taps it is necessary to evaluate the thickness of the back-splash.

Alzate in multistrato di betulla rivestito in diverse finiture, in Cristalplant® biobased bianco o in marmo da posizionare a parete e in appoggio sul bordo posteriore del piano.

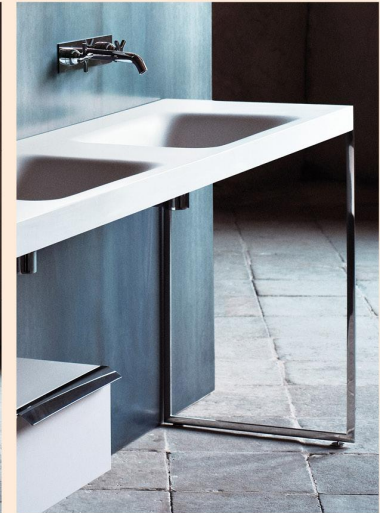

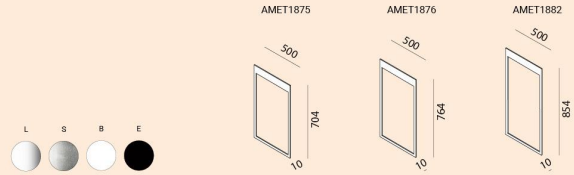

Per l'installazione dei rubinetti ad incasso è necessario valutare lo spessore dell'alzata.

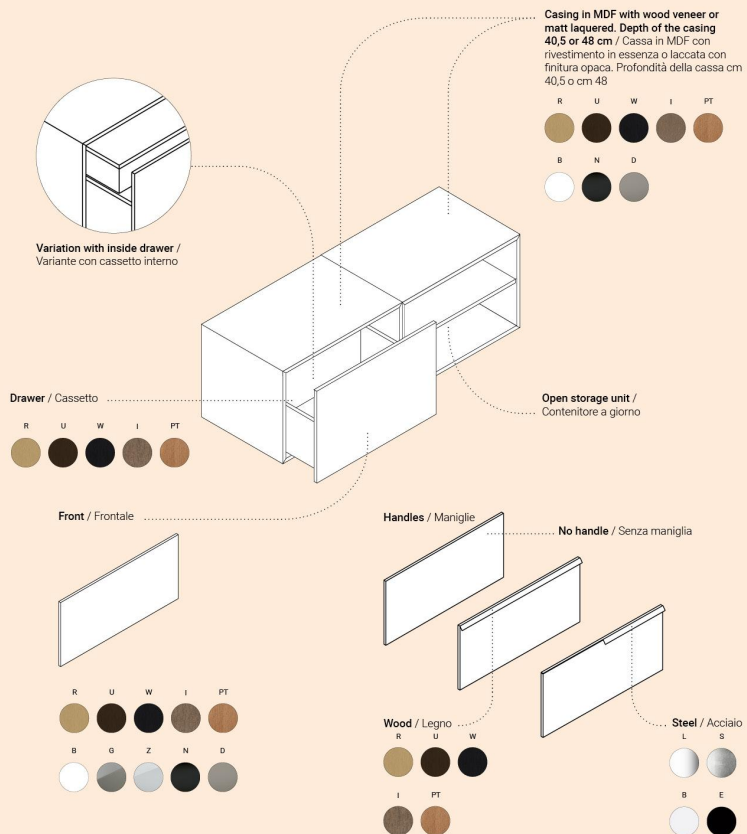

Strutture per piani/ countertop structures

6 and 12 cm thick self-bearing countertops or to be rested on cabinets can be completed with single or double side structures in stainless steel. Available in polished or satin-finished stainless steel or painted black or white.

I piani autoportanti o d'appoggio con spessore cm 6 e cm 12 possono essere completati con strutture laterali in acciaio inox, utilizzabili singole o doppie. Disponibili con finitura inox lucido o satinato oppure laccate in bianco o nero.

The screenshot shows a web page for the Agape Flat XL system. At the top left is the Agape logo. To its right is a search bar with a magnifying glass icon and the text "Search". Further right are three icons: a hamburger menu, a globe, and a heart. The main heading reads "The Flat XL system by Benedini Associati: Functional and aesthetic starting from the countertops." Below this is a paragraph: "A huge collection of modular elements, designed by Benedini Associati: countertops in three different thicknesses, and support frames and storage units that integrate with Agape washbasins, decorating the bathroom with an endless range of compositions suitable for any shape, size or style of room." To the right of the text is a line drawing of a child wearing a party hat sitting on a countertop next to a black cat and a white washbasin. At the bottom of the page are three orange buttons: "Request a consultation", "Assembly Instructions", and "File 2D".

D. Sistema Rigo / Rigo system

Componenti / components

Rigo is a bathroom furnishing system with a strong architectural inspiration. Two parallel beams run along the wall and create a linear top on which washbasins and accessories are placed.

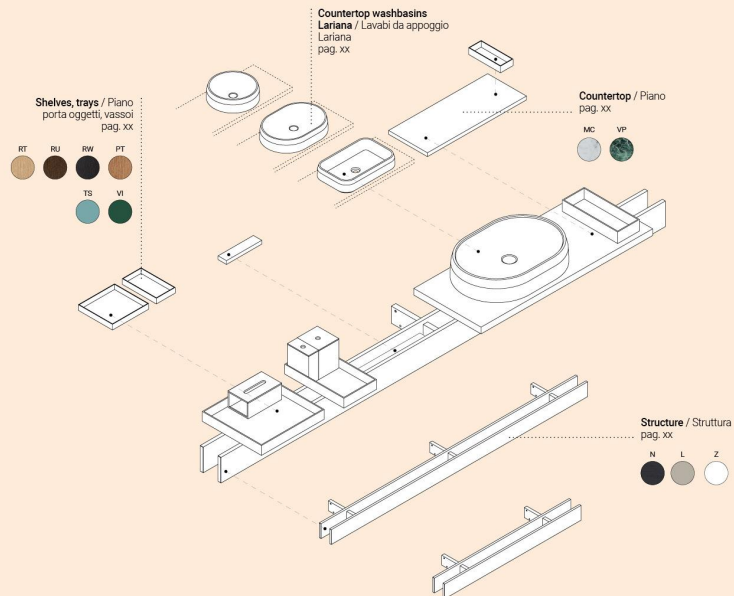

A detailed series of trays and containers and a mirror allow multiple configurations, from the simplest to the most elaborate. The combination of marble, wood and aluminium create a sophisticated aesthetic and textured look.

Rigo is a minimalist take, a contemporary synthesis, on the traditional bathroom setting designed by Patricia Urquiola.

Rigo è un sistema di arredo bagno di forte ispirazione architettonica. Due travi parallele corrono lungo il muro e definiscono uno spazio di appoggio lineare su cui vengono disposti lavabo e accessori.

Una serie dettagliata di vassoi, contenitori e uno specchio, consentono molteplici configurazioni del sistema, dalle più semplici a quelle più articolate. L'accostamento di marmo, legno e alluminio conferisce ricercatezza estetica e materica.

Rigo è una traduzione minimale, una sintesi contemporanea dell'ambiente bagno tradizionale disegnato da Patricia Urquiola.

Struttura / structure

Support structure for washbasin and accessories consisting of two parallel joined bars, fixed on the wall. Created in black satin-finish anodised aluminium or lacquered in white (RAL9003), light grey (RAL7044) or in other RAL colours on request, it has a minimum length of 120,4 cm and a maximum length of 300,4 cm.

Struttura di sostegno per lavabo e accessori costituita da due barre parallele collegate tra di loro e fissate alla parete. Realizzata in alluminio anodizzato spazzolato nero o verniciata in bianco (RAL9003), grigio chiaro (RAL7044) o con altri colori RAL a richiesta, ha lunghezza minima cm 120,4 e massima cm 300,4.

Struttura / structure

Piani / countertop

Washbasin or tray support top made of white Carrara or green Alpi marble to fix to the Rigo structure.

The washbasin countertop can be positioned along the entire length of the structure and all the Lariana washbasins can be positioned on this.

The tap cannot be placed on the countertop.

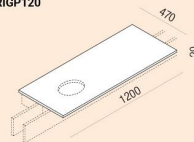

The tray can be freely positioned between the two aluminium bars. The resting surface is 85 mm from the upper structure edge.

Piano portalavabo o portaoggetti realizzato in marmo bianco di Carrara o in marmo verde Alpi da fissare alla struttura Rigo.

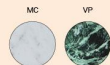

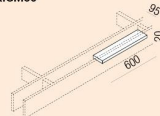

Il piano portalavabo può essere posizionato su tutta la lunghezza della struttura e su questo è possibile collocare tutti i lavabi Lariana. Non è possibile inserire il rubinetto sul piano.

Il piano porta oggetti si posiziona liberamente tra le due barre in alluminio, la superficie di appoggio è a 85 mm dal filo superiore della struttura.

ARIGP120

ARIGM50

Vassoi / trays

Wooden trays in various sizes and finishes to accessorise the Rigo structure.

Two trays with the same depth and two different widths to be fixed directly and freely to the structure, while a third tray can be placed on the countertop.

The trays are made of solid oak with natural, brown or dark oak finish or in reconstituted wood with teak finish or open pore painted in green pine (RAL6028) or pastel turquoise (RAL6034).

The trays are made to hold the various elements which make up the Puzzle series.

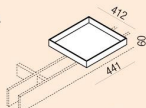

Vassoi porta oggetti in legno in diverse dimensioni e finiture per accessorizzare la struttura Rigo.

Due vassoi con la stessa profondità e con due larghezze diverse si fissano direttamente e liberamente alla struttura, un terzo vassoio può essere collocato sul piano.

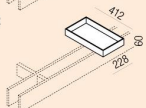

I vassoi sono realizzati in rovere massello con finitura naturale, bruno, scuro o in legno precomposto con finitura teak oppure verniciati a poro aperto in verde pino (RAL6028) o turchese pastello (RAL6034).

I vassoi sono predisposti dimensionalmente per alloggiare i vari elementi che compongono la serie Puzzle.

ARIGV22

ARIGV15

Vassoi interni / internal trays

Specchi / mirrors

Specchio tondo bifacciale, un lato ingranditore, con cornice e tubi flessibili cromati da fissare liberamente sulla struttura Rigo.

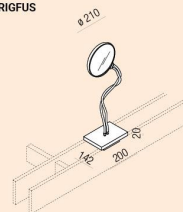

La base in marmo è disponibile in marmo bianco di Carrara o in verde Alpi.

Fattore di ingrandimento 2, lunghezza tubi 500 mm.

Round, double-sided mirror, one side with magnification, with frame and flexible, chromed pipes to fix on the Rigo structure. The marble base is available in white Carrara marble or verde Alpi.

Magnifying power: 2. Length of tubes: mm 500 (19" 3/4).

ARIGFUS

Search

Rigo System by Patricia Urquiola: Synthesis and Modularity made to measure.

Rigo, renewing the intense collaboration with Patricia Urquiola since 2004, becomes with its parallel beams running along the wall, the most recent manifestation of what Agape means by Bathroom Architecture.
