^{EN} Dansi is a system of wall lamps composed of geometries in dialogue with each other. The concept behind it is to create an interaction between sculptural forms that function either as a collective or as individual light. A continuous game of contrasts between light and shadow, movement and stasis, irony and rigor, suggesting the image of a thread that runs inside and outside of the wall, but also that of ideograms with their forcefully expressive character.

The elements of the family are luminous marks that creates ever-changing atmospheres, depending on the composition: the four available geometric forms, like the head and tail of a "thread" with a curved form, and the two arches, are ready to respond to any installation requirement, alone or in free combinations. Thanks to an LED matrix equipped with a diffuser screen, they offer soft efficient lighting aimed at the wall.

^{IT} Dansi è un sistema di lampade da parete formato da geometrie in dialogo tra loro. Il concept alla base è quello di creare un'interazione tra forme scultoree che agiscono come un insieme o come singole unità luminose. Un gioco continuo di contrasti tra luce e ombra, movimento e staticità, ironia e rigore, che rimanda all'immagine di un filo che scorre dentro e fuori la parete, o ancora, a quella di ideogrammi dal forte carattere espressivo.

Gli elementi che la compongono sono segni luminosi in grado di creare scenari sempre nuovi a seconda dell'installazione: le quattro geometrie, come il capo e coda del "filo" dalla forma curva e i due archi, rispondono a qualsiasi esigenza installativa, da sole o abbinate liberamente. Grazie a una matrice LED corredata da uno schermo diffondente, sono in grado di offrire un'illuminazione morbida ed efficiente orientata verso la parete.
