Limetry

^{EN} Elegance and rigor characterize Limetry, a novel interpretation of a system for various configurations with a decorative approach.

The key element is a rectangular module, with double emission and available in two sizes, whose four corners are fundamental for the connection of multiple parts.

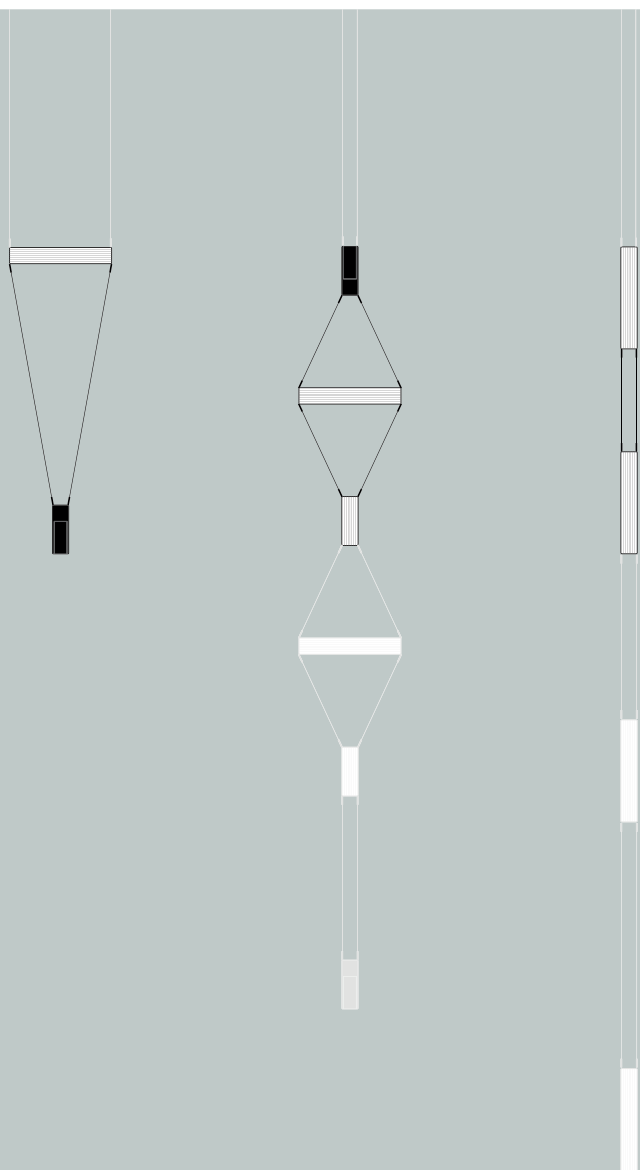

To enhance the system, in addition to ambient lighting, a functional spotlight that emits LED light only downward and upward. It can be installed by itself, with other elements, or combined with a prismatic disk capable of softening the light.

This new system, created to meet the needs of users thanks to its multiple configuration possibilities (like chandeliers, in tall linear compositions or as luminous partition walls) can be also used on a track or paired with an attachment: the result is a precise design, also obtained thanks to the effect of gravity.

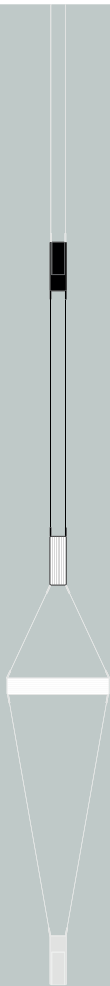

^{IT} Eleganza e rigore caratterizzano Limetry, un'inedita interpretazione di un sistema configurabile con una propensione decorativa.

Elemento cardine è un modulo rettangolare, a doppia emissione e disponibile in due dimensioni, i cui quattro vertici sono fondamentali per il collegamento fra più elementi. Ad arricchire il sistema, oltre alla luce d'ambiente, uno spot funzionale che emette luce LED verso il basso o l'alto, che può essere allestito da solo, con gli altri elementi o abbinato a un disco prismatico che ingentilisce la luce. Il sistema, nato per incontrare le esigenze del fruitore grazie alle sue molteplici possibilità di configurazione (chandelier, in composizioni lineari alte o pareti divisorie luminose) può vivere anche su binario o essere abbinato al suo rosone. Il risultato finale sarà sempre un disegno preciso, ottenuto anche grazie all'effetto della gravità.
