About Agape

It all started, almost by chance, in 1973. We often joke that we would have liked to do something else. And yet, here we are: immersed in the bathroom space, with more than fifty years of relentless commitment to shaping the most intimate part of the domestic landscape. Enjoying the journey, but never losing focus. Project after project, we have continued to challenge conventions, guided by the informal inventiveness passed down to us by Mantuan culture. We have refined our language to express our vision of the bathroom and to enable architects and designers worldwide to do the same. And so, project after project, we have created our own vocabulary: a timeless and exquisitely Italian repertoire that has certainly contributed to revolutionizing the design of the bathroom.

2 ENG The founders: Emanuele and Giampaolo Benedini. ITA I fondatori: Emanuele e Giampaolo Benedini.
3 ENG Agape Bosco in Correggio Micheli Bagnolo San Vito near Mantua, Italy. ITA Agape Bosco a Correggio Micheli Bagnolo San Vito vicino a Mantova, Italia.

Tutto è iniziato, quasi per caso, nel 1973. Scherziamo spesso dicendo che avremmo voluto fare dell'altro. E, invece, eccoci qui: immersi nella stanza da bagno, impegnati da più di cinquant'anni a progettare lo spazio più intimo del paesaggio domestico. Divertendoci, ma senza mai perdere la concentrazione. Progetto dopo progetto, abbiamo continuato a sfidare le convenzioni dell'abitare, guidata da quell'inventiva informale che ci ha trasmesso la cultura mantovana. Abbiamo perfezionato il nostro lessico per esprimere la nostra visione del bagno e per permettere di fare altrettanto ad architetti e designer in tutto il mondo. E così, progetto dopo progetto, abbiamo creato il nostro vocabolario: un repertorio senza tempo e squisitamente italiano che ha contribuito a rivoluzionare il design del bagno.

Beyond Boundaries

This is where contemporary living gazes with growing curiosity. As interiors break free from rigid functional definitions, exteriors open up to new possibilities: boundaries become thresholds, introducing fresh cultural and design perspectives; transitional spaces welcome new bathroom rituals, preserving their intimacy while simultaneously connecting them to nature and a deeper sense of self.

- 4 ENG House in Procida, Bernard Rudofsky, 1938. ITA Casa a Procida, Bernard Rudofsky, 1938.
- 5 ENG Garden of Casa Nivola, Bernard Rudofsky 1951. ITA Giardino di Casa Nivola, Bernard Rudofsky, 1951.
- 6 ENG Barcelona Pavilion, Mies van der Rohe, 1928. ITA Padiglione di Barcellona, Mies van der Rohe, 1928.

Oltre le mura. È qui che l'abitare contemporaneo si affaccia con crescente curiosità. Mentre gli interni si liberano da rigide definizioni funzionali, gli esterni respirano nuove opportunità: i limiti diventano soglie che introducono inedite visioni progettuali e culturali; spazi di transizione accolgono nuovi riti del bagno, ne custodiscono l'intimità e, al tempo stesso, la connettono alla natura e a una dimensione più profonda del sé.

6

7

The history of architecture is rich with modulations between the two extremes of “inside” and “outside”. Le Corbusier situates his rooftop gardens at the boundary between sky and built form. The Cartesian landscape of Mies van der Rohe’s Barcelona Pavilion opens up the traditional enclosure of architectural structures. Bernard Rudofsky dissolves the boundary between architecture and nature in his drawings and installations, each one imbued with the pleasure of living. Pérez Palacios anchors his hammock securely within four walls, yet under the open sky: an ephemeral mediation between a body of water and the vast blue horizon of Mexico.

La storia dell’architettura è ricca di modulazioni tra i due estremi del “dentro” e del “fuori”. Le Corbusier dispone i suoi tetti-giardino al confine tra il cielo e il costruito. Il paesaggio cartesiano del Padiglione Barcellona di Mies van der Rohe scopre l’involucro tradizionale del manufatto edilizio. Bernard Rudofsky fonde architettura e natura nei suoi disegni e nelle installazioni permeati, fino alle radici, del piacere di vivere. Pérez Palacios colloca la sua amaca al sicuro tra quattro mura, ma all’aperto: effimera mediazione tra un volume d’acqua e l’azzurro dell’orizzonte messicano.

The Outdoor Collection takes Agape’s bathroom design beyond the walls. With elements that, through their materials, function, or innovation, extend the boundaries of the bathroom into the open air—where sky and nature become the essential complements to a new Agape experience.

La Outdoor Collection porta “oltre le mura” il progetto bagno di Agape. Attraverso elementi che, per le qualità dei materiali, per funzione o per innovazione, estendono i confini della stanza da bagno verso l’esterno, dove cielo e natura diventano i complementi essenziali di una nuova esperienza di benessere firmata Agape.

Finishes + Materials

Cemento

ENG Cemento is a new material conceived to be used both outdoors and indoors. It is a compound of concrete and resin, enriched by carefully chosen aggregates which grant its high technical and structural performance, even when used with minimal thicknesses. The material is cast molded allowing great variety of geometries, a high level of detail and high resistance to wear. Cemento, thanks to its composition, is particularly resistant to dirt and maintains its aesthetic qualities unaltered in time. Being handcrafted, the different production phases, although kept under strictly controlled conditions, are inevitably influenced by hygrometric and seasonal climatic changes. This could lead to slight color shading and discoloration among products with the same finish.

Finiture + Materiali

Cemento

ITA Cemento è un composto nuovo, concepito per applicazioni outdoor e indoor. Il materiale è generato da un impasto di cemento e resina arricchito di inerti accuratamente selezionati che sono garanzia di elevate prestazioni tecniche e strutturali, anche con spessori molto ridotti. La lavorazione per colatura in stampo permette un'ampia libertà nelle geometrie, un livello molto alto di dettaglio e una elevata resistenza all'usura. La sua composizione lo rende particolarmente resistente allo sporco e garantisce caratteristiche estetiche stabili nel tempo. Realizzato con processi artigianali, le fasi di preparazione e lavorazione del materiale, per quanto controllate, sono inevitabilmente condizionate dalle caratteristiche igrometriche e climatiche stagionali che possono produrre lievi stonalizzazioni e discromie tra diversi prodotti dello stesso colore.

Finishes + Materials

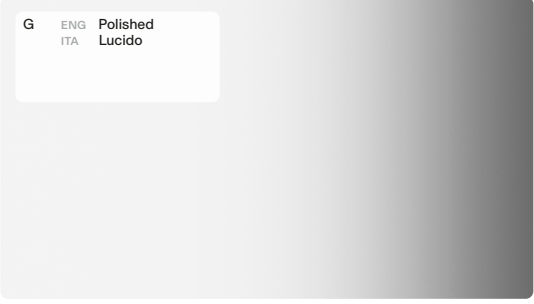

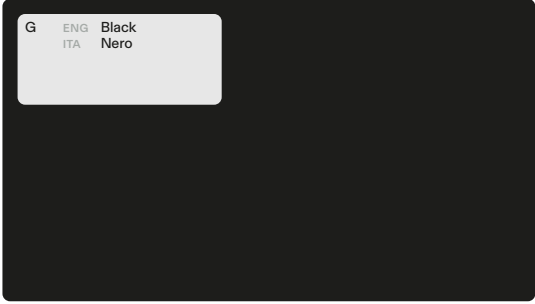

Stainless steel

ENG Stainless steel is easy to work with, resistant to high temperatures and does not alter the color, taste and smell of what it contains. This allows it to be widely used in the architectural field and in the various ambiances of the house such as the bathroom or kitchen. There are different types of this material, which vary according to their composition and are classified according to the AISI nomenclature (American Iron and Steel Institute). Agape realises its products with AISI 304 and AISI 316L steels which are among the best performing currently available on the market, aesthetically identical to each other although different in chemical composition. AISI 304 is a very precious stainless steel which, thanks to its great chemical stability, ensures an almost indefinite duration over time of its aesthetic and performance characteristics even in contexts characterized by high humidity such as bathroom. Thanks to the addition of molybdenum and the increase in nickel content, AISI 316L (where L indicates "low carbon" content), steel offers even higher performance and further guarantees in particularly corrosive environments such as marine ones.

Finiture + Materiali

Acciaio inox

ITA L'acciaio inox è facile da lavorare, resistente alle alte temperature e non altera colore, sapore e odore di ciò che contiene. Questo ne permette un ampio utilizzo in campo architettonico e nei vari ambienti della casa come il bagno o la cucina. Esistono diverse tipologie di questo materiale, che variano a seconda della loro composizione e vengono classificate in base alla nomenclatura AISI (American Iron and Steel Institute — Istituto di unificazione statunitense per ferro e acciaio). Per i suoi prodotti, Agape utilizza acciai AISI 304 e AISI 316L, tra i più performanti attualmente disponibili sul mercato, esteticamente identici tra loro sebbene diversi per composizione chimica. L'AISI 304 è un acciaio inossidabile molto pregiato che, grazie alla sua grande stabilità chimica, assicura una durata quasi indefinita nel tempo delle sue caratteristiche estetiche e prestazionali anche in contesti dall'umidità elevata come il bagno. Grazie all'aggiunta del molibdeno e all'aumento del contenuto di nichel, l'acciaio AISI 316L (dove L indica "low carbon", basso tenore di carbonio) offre prestazioni ancora più elevate e ulteriori garanzie in ambienti particolarmente corrosivi come ad esempio quelli marini.

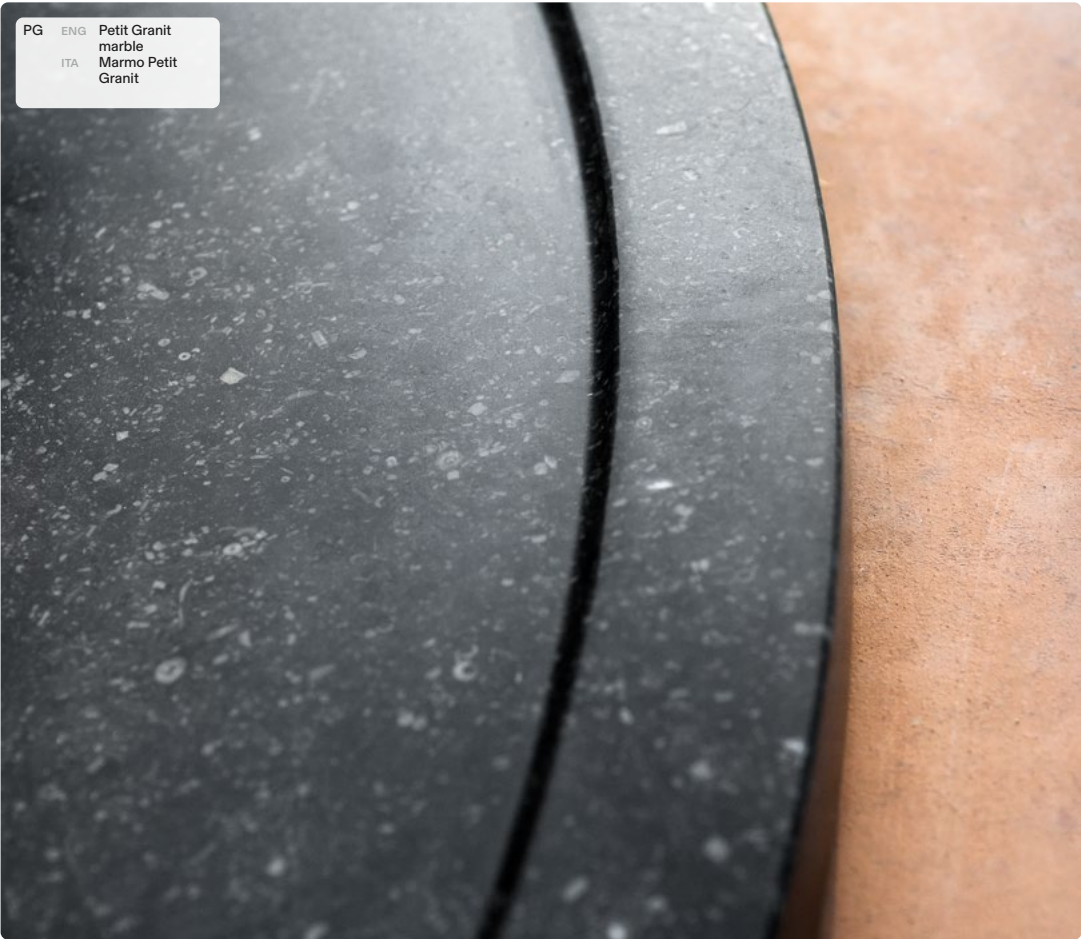

Finishes + Materials
Petit Granit

ENG Petit Granit originates from Belgium, home to the only known deposits and a place where it is widely used in architecture. Also known as Belgian Blue Stone, it is not actually a granite—despite offering similar mechanical properties—but a limestone. Compact and homogeneous, it maintains consistent characteristics, with a color that ranges from gray to near black, depending on its processing and surface treatment. Thanks to its density, Petit Granit is easy to clean, resistant to infiltration, and highly durable against dirt and frost.

Finiture + Materiali
Petit Granit

ITA Il Petit Granit è originario del Belgio, dove si trovano gli unici giacimenti e dove è ampiamente utilizzato in architettura. Chiamato non a caso anche Pietra Blu del Belgio, non appartiene alla famiglia dei graniti (pur avendo simili prestazioni meccaniche), ma è una pietra lapidea calcarea. Compatta e omogenea, ha caratteristiche costanti e un colore che va dal grigio al quasi nero, in base alla lavorazione e al trattamento superficiale. Data la sua compattezza, il Petit Granit è facile da pulire, non è soggetto a infiltrazioni, ed è molto resistente allo sporco e al gelo.

ITA La sede Agape Bosco, vicino Mantova, nel cuore del Parco Naturale del Mincio.

Crafting Projects

We are architects at heart, working alongside architects and designers to create solutions that seamlessly integrate into architecture. This is why the products in the Agape catalog, often born from specific needs, establish a profound dialogue with the spaces they inhabit, becoming elements of a carefully crafted language for bathroom architecture. We pay special attention to materials and manufacturing processes: all Agape products are made in Italy using high-quality raw materials, artisanal dedication to detail, and efficient processes that are as environmentally responsible as possible.

2 **ENG** The green Cemento of the Bjhon 1 washbasin evokes the organic elements of nature.
ITA Il Cemento verde del lavabo Bjhon 1 evoca gli elementi organici della natura.

Siamo architetti nel cuore e lavoriamo con architetti e designer per progettare soluzioni che siano parte di un'architettura. Per questo, i prodotti del catalogo Agape, spesso nati da esigenze specifiche, stabiliscono relazioni intense con lo spazio che li accoglie, diventando elementi di un linguaggio attentamente curato per un'architettura del bagno. Riserviamo un'attenzione particolare ai materiali e ai metodi di lavorazione: tutti i prodotti Agape sono realizzati in Italia con materie prime di qualità, dedizione artigianale al dettaglio, processi efficienti e il più possibile rispettosi dell'ambiente.

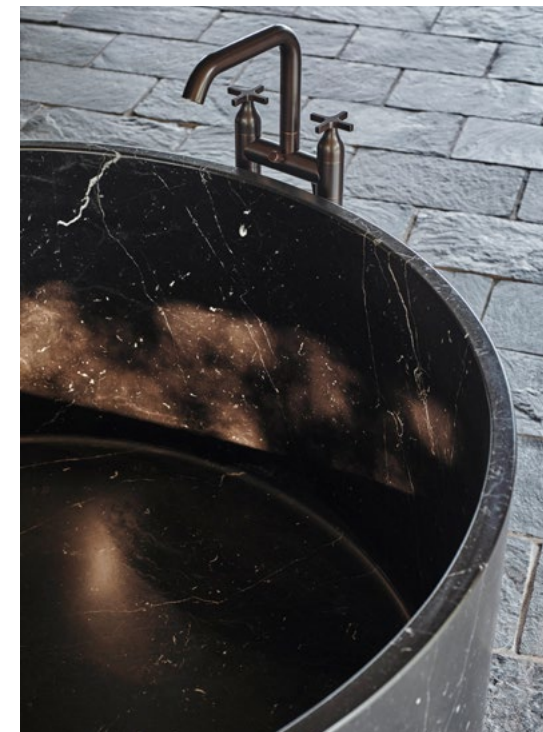

Transcending Time

In bathroom architecture, enduring solutions respond to timeless questions. Our designs and products steer clear of passing trends, focusing instead on concepts that stand the test of time through adherence to the principles of good design and the quality of materials. From this approach—rooted in patient, continuous research—have emerged objects that have radically transformed the way we experience the most private dimension of contemporary living.

Nell'architettura del bagno, soluzioni durature rispondono a questioni senza tempo. I nostri progetti e i nostri prodotti schivano le mode del momento per concentrarsi su proposte che sfidano gli anni grazie alla loro aderenza ai principi del buon design e alla qualità dei materiali. Da questo approccio, e da una ricerca costante e paziente, sono nati oggetti che hanno cambiato radicalmente il modo di vivere la dimensione più intima dell'abitare contemporaneo.

Embracing Mantova

We are international by nature, yet deeply in love with our “home,” just steps from the banks of the Mincio River and Renaissance Mantua. Our land reflects who we are: informal and welcoming, a fertile blend of nature and joy for life, culture and tradition, technology and craftsmanship, creativity and lateral thinking. This place has taught us to believe that in everything we do, and in the way we do it, there must always be a certain, ineffable elegance.

Siamo internazionali per natura, ma siamo anche profondamente innamorati della nostra “casa”, a pochi passi dalle rive del Mincio e dalla Mantova rinascimentale. Il nostro territorio è come noi: informale e ospitale, un intreccio fertile di natura e gioia di vivere, cultura e tradizione, tecnologia e manifattura, creatività e pensiero laterale. È questa terra che ci ha portati a credere che in tutto ciò che facciamo, e nel modo in cui lo facciamo, debba esserci sempre una certa, ineffabile eleganza.

Agape Stores

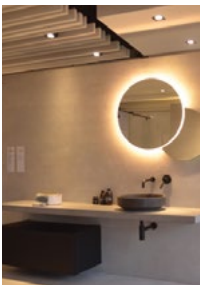

Agape Worldwide

Starting from Mantua, Agape's timeless furnishings have also found their place in the world thanks to a network of more than three hundred selected dealers in sixty countries in addition to the everexpanding number of Agape Stores in Italy and abroad.

p. 093 — 095

Da Mantova, gli arredi senza tempo di Agape hanno trovato il loro posto nel mondo anche grazie a una rete di oltre trecento rivenditori selezionati in sessanta Paesi a cui si aggiungono gli Agape Stores in continuo ampliamento in Italia e all'estero.
