Hinpan

Hinpan

^{EN} Hinpan is a new acoustic solution, a suspended polyurethane foam “cloud” that absorbs sound and gently diffuses light. It is not just a lamp, but a real sensorial experience, equipped with a textile cover of remarkable aesthetic impact, it stands out for its full design and exceptional acoustic and lighting performance.

An optional diffuser that catches the light and diffuses it in the space makes it ideal not only for the lighting of surfaces, but also as a central luminous point in entire rooms.

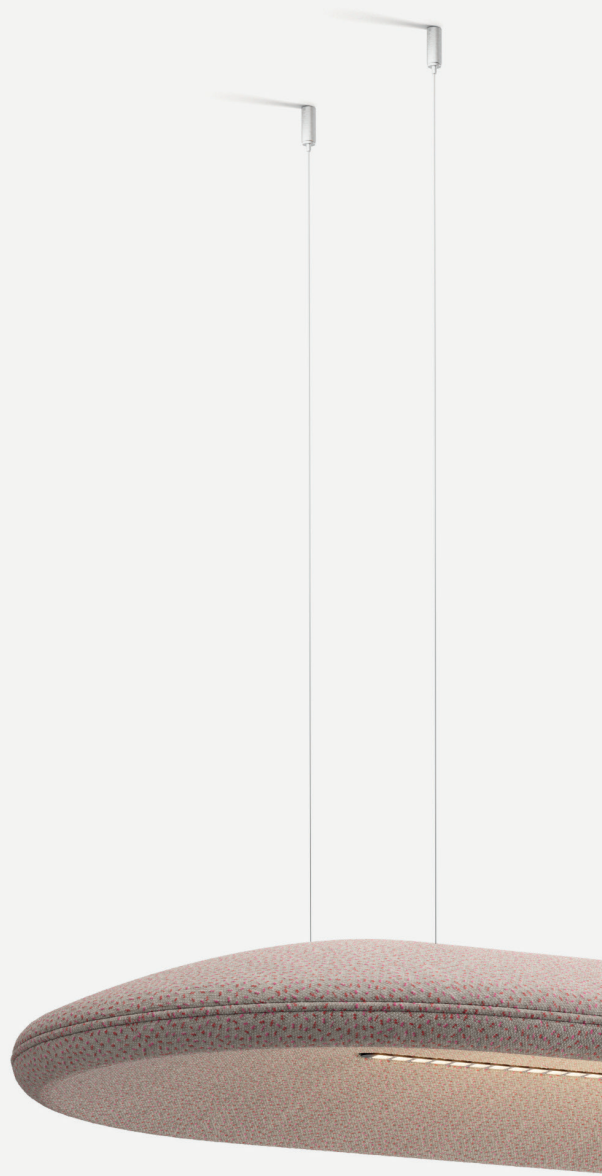

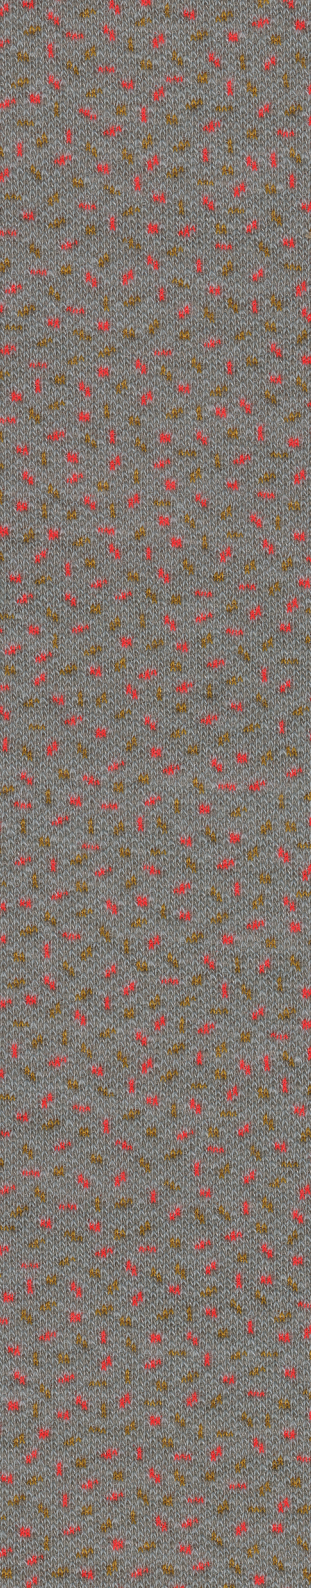

Also available in a linear version, always with both direct and indirect lighting (further enhancing the “floating” effect), Hinpan is a concrete solution to modern needs of acoustic and luminous comfort, in which technology merges with aesthetics to improve the everyday experience of spaces.

^{IT} Hinpan è una nuova soluzione acustica, una “nuvola” in poliuretano espanso che cattura il suono e diffonde la luce in modo delicato. Non è soltanto una lampada, ma una vera e propria esperienza sensoriale, con un rivestimento tessile dal forte impatto estetico, si contraddistingue per il design pieno e la sua performance acustica e illuminotecnica straordinaria.

Un diffusore distribuisce la luce, la rende adatta non solo a illuminare un piano, ma anche a fungere da punto luce centrale per interi ambienti.

Proposta inoltre in una versione lineare, Hinpan è una risposta concreta alle esigenze moderne di comfort acustico e luminoso, in cui la tecnologia si fonde con l'estetica per migliorare l'esperienza quotidiana degli spazi.
